PROSPECT OF THE DISSOLUTION OF
THE FRENCH ASSEMBLY.

A CHOLERA CONFERENCE—THE FEZ INSURRECTION QUIETED.
PARIS, June 8.—The feeling at Versailles is gloomy. The proposal for the dissolution of the Assembly has been signed by one hundred and twenty-five of the Deputies, who have hopes of securing, in addition, the signatures of one hundred and ninety-five members, forming the Left Centre. A motion for dissolution will be presented in the Chamber at the earliest opportunity.

PROGRAMME OF THE LEFT CENTRE.
LONDON, June 2, 5 a. m.—The Times' correspondent at Paris telegraphs that it is expected that Dufaure, in a few days, will ask the committee on constitutional laws to come to a vote on the first article of the bill introduced May 1874, providing that the government consist of a Senate, Chamber of Representatives and President of the

public. If the committee rejects the article, the Left Centre will move in the Assembly to refer a similar proposition to a new commission. Should this fail, the Left Centre, as a last resort, will move the dissolution of the Assembly. In event of any adverse votes, the Deputies belonging to all sections of the Left may possibly resign en masse.

ANXIETY FOR THE EARL OF TAVERBROUGH.

LONDON, June 8.—The London morning journals refer to the unexplained absence from the publication of an Earl, whose name they withheld from publication. The papers state that he was last night in the House of Lords on Tuesday, the aide-de-camp. The affair causes anxiety and excitement.

A dispatch from Liverpool says the *Courier of the City* says the missing peer is the Earl of Yarborough, who has disappeared once before for several weeks. The police are searching for him, it seems that the Earl of Yarborough is addicted to drink; that on Tuesday last the deputy sergeant-at-arms of the House of Lords, believing him to be in a worse condition than usual, coaxed him into a private room and left him there. Upon the return of the officer, a half hour later, the Earl was gone and has not since been seen.

THE LATE BURNING OF WITCHES.

All the parties implicated in the burning of the

labeled sorcerers in Jacobo are in prison. Four were arrested by the police, and the others surrendered themselves. None of them can read and write except one who is a village schoolmaster, who says the outrage would not have been perpetrated had not the Prefect sent orders to hurry the execution. It is thought if the Superior Court would order a court to try the case the prisoners will escape justice. The judge before whom they have appeared is disposed to discharge them on bail. Several of the accused are Indians.

ANOTHER PLANET DISCOVERED.

THE NEW YORK SUN AND THE NEW YORK TIMES.
[New York Commercial Advertiser.]
The Sun and Times have formed an alliance against the Tribune. Poverty, politics, envy and other bad passions make strange bed-fellows. The alliance of the Sun and Times is most extraordinary. That two people, who called each other the worst names that language could ex-

others, should cuddle under the same dirty bedclothes, and lie in each other's embrace, just because they are envious of the Friar's success—an exhibition of weakness and malice that must bring discredit on the profession. We expected better things from our sparkling neighbor the Sun, bask from the viper and harlequin of the Times it is just what we did expect. A being lost to all feeling that would lie down with stiffness to incarnate one with whom he had a quarrel, is capable of anything malicious.

The number of barrels of fermented liquors stored and sold in the United States for the year ending June 30, 1978, was \$910,822—an increase of \$1,454 over 1977. The capital invested in breweries is \$20,218,223; in malt-houses, \$16,707,793; in barley lands, \$45,554,129; in hop lands, \$1,000,960; making a total of \$102,775,006. The number of persons employed, directly or indirectly, in the manufacture was 35,477. The total internal revenue for the year ending June, 1978, from all

figures show that the advocates of total abstinence are opposed by an amount of capital equal to \$100,775,000, and by an army of 56,477 persons dependent for a livelihood on the liquor trade.
